Issue #1: Frames must have an accessible name

Pillar: UX & Accessibility · **Severity:** Medium · **Occurrences:** 1 detected · **Sources:** axe-core

TECHNICAL EXPLANATION & IMPACT:

Ensure <iframe> and <frame> elements have an accessible name

RECOMMENDED REMEDIATION:
Add a descriptive **`title`** attribute or **`aria-label`** to the frame element (e.g. <iframe title="Discord Community Widget">) so screen readers can announce its context to assistive technology users.

Affected Locations: Detected on 1 page(s) (https://www.hackthissite.org/discord)
Sample Selector: `iframe`
